

BZ-HU003A

Intelligent housekeeping & A/C control card pluggable module

Product Introduction:

Dalitek's BZ-HU003A programmable room control box is designed to power the next generation of smart hotel rooms. This system can work as a standalone unit or networked with the building management software (BMS) for central control and monitoring.

The BZ-HU003A has been designed to interface with and control all types of modern hotel infrastructure including housekeeping and HVAC. This room control system delivers reliable robust control that will ensure that your guests obtain the optimum experience during their stay .

Technical Parameters:

- DND, MUR, Service request, Wait, Doorbell, SOS, insert card for power, motion sensor, door magnetic input
- 4 × LED indicator (common cathode or anode) output for DND, MUR, Wait,
- Service request
- One channel emergency lighting
- Compatible to two-pipe or four-pipe Fan coil control (High, mid, low)
- 0-10V brushless DC fan coil control
- One channel fresh air control
- 1 × analog temperature sensor
- 3 × RS485 (One for external net, one for internal net and one for HAVC)
