

BZ-HU003B

Intelligent guest room lighting control card pluggable module

Product Introduction:

Dalitek's BZ-HU003B programmable room control box is designed to power the next generation of smart hotel rooms. This system can work as a standalone unit or networked with the building management software (BMS) for central control and monitoring.

The BZ-HU003B has been designed to interface with and control light dimming. This room control system delivers reliable robust control that will ensure that your guests obtain the optimum experience during their stay .

Technical Parameters:

- 12 channel relay output , 3A/channel
- 2 channel dimming output, 2A/channel;
- 15 dry contact input (customizable)
- 4 channels LED output, 12V/channel
- 3 × RS485 (One for external net, one for internal net and one for HAVC)
